## THE BARCODE EXPERTS

### *The Axicon "S" Range for enhanced accuracy*

#### Product Summary

Independently tested & certified to meet International Standards, the Axicon 6025-S verifier has been specifically designed for all barcodes where a 3, 5, 6, 10 or 20mil aperture is mandatory up to a maximum width of 66mm (2.6") including quiet zones.

The simple to use design reduces user error and eliminates product damage whilst providing the highest level of accuracy achievable for verification.

#### Typical Application

Consumer level (Point of Sale) barcodes whether being verified on film, cartons, bags, cans, pots or jars plus all linear barcodes of a similar size.

#### Installation

Simply install the software on your computer, plug in the verifier and you can be confident that your barcodes are being checked to the highest standards. The software includes everything you could ever need from a barcode verifier. Traceability features include automatic saving of files, reports in a variety of formats, data content checks against a wide range of application standards as well as the product look-up function - helping you to ensure that your barcodes are fit for purpose.

The Axicon Verifier, when used in conjunction with the accurately produced calibration sheet, forms an integral part of your ISO 9000 quality control procedures.

Free software updates are downloadable from our website [www.axicon.com](http://www.axicon.com), ensuring that your verifier will remain at the leading edge.

#### Enhanced Accuracy and Improved Productivity

The "S" range of Axicon verifiers has a "Continuous Scan" feature. Just place the verifier at the top or bottom of the barcode, press the trigger and slide the verifier over the code - in less than a second you can have results averaged up to 100 verifications of the code at different points in the bar height.
